

SKILLS

- Languages:** Java (*Intermediate*), JavaScript (*Intermediate*), C language (*Intermediate*), Python (*Beginner*).
- Libraries:** React.js, Node.js, Next.js, Node.js, Scikit-Learn, TensorFlow
- Tools:** Git - Version control, JIRA.
- Databases:** MySQL (*Intermediate*)
- Others:** HTML, CSS, Object Oriented Programming, Json Web token (JWT), RESTful API, Postman, Web vitals, Fine-tuning LLMs, Generative-AI, AI Agents, MCP.
- Soft Skills:** Teamwork, Leadership, Communication, Presentation.

WORK EXPERIENCE

QED42 – Web Development Intern

GIT, JavaScript, Next.js, RAG, Python, Drupal, GitLab, Open-Source Contribution

Present

- Contributed to Drupal Core with multiple merge requests, including bug fixes and new features.
- Developed headless CMS solutions by integrating Drupal with modern frontends like Next.js for dynamic web applications.
- Built intelligent content systems using Retrieval-Augmented Generation (RAG) and AI agents, improving content delivery and automation for web applications.

PROJECT(S)

Data-Driven Traffic Analysis System for Pune Municipal Corporation (PMC) | [Certificate](#)[Source Code](#)

MongoDB, Express.js, React.js, Node.js, Google Maps API, Cloudinary, TensorFlow

Sep 24 – Feb 25

- Developed a web-based portal to analyze and mitigate urban traffic issues by integrating real-time traffic insights with data on potholes, complaints, nearby institutions, and live congestion.
- Enabled citizen participation through road issue reporting verified via machine learning models.
- Reduced API response time significantly through batch filtering and efficient handling of route points improving system performance by **20x**. Managed API rate limits with strategic delays for smooth performance.

HomeSeek – Productive Real Estate Marketplace | [Live Link](#)[Source Code](#)

React.js, Node.js, MongoDB, Prisma, JWT

Jun 24- Aug 24

- Developed a full-stack web application for real estate listing and rental services, enabling users to browse, filter, and view detailed property information through an interactive map interface.
- Integrated JWT-based authentication and authorization for secure login and registration functionality.
- Designed and optimized the backend with Node.js, Express, and MongoDB, utilizing Prisma as an ORM for efficient database operations.
- Structured the system architecture to ensure efficient handling of protected routes using middleware.

Fish Species Identification

Python, Deep Learning, Web-Scrapping, Flutter, OpenAI API

[Source Code](#)

Feb 23- Apr 23

- Developed an Android app for fish species identification using image uploads, achieving **94.55%** accuracy.
- Additional features include real-time location-based fish pricing, and information on edibility of fish.
- Performed Image Data collection from multiple sources, Data loading, Data pre-processing, Model building, Model training, Hyper-parameter-tuning, and real-time location-based pricing.
- Successfully applied Transfer Learning to reduce training time by **70%**.

EDUCATION

Vishwakarma Institute of Technology

B-Tech, Computer Engineering (CGPA - 8.9)

Pune

2021 – 2025

Coursework – DBMS, Operating System, Computer Network, Artificial Intelligence, Data Science.

ACHIEVEMENT(S)

- Solved over 600+ problems across LeetCode and GeeksforGeeks, showcasing strong Data structure and algorithm skills

[LeetCode](#) | [GFG](#)
- Awarded for outstanding contributions to the 'Translate Existing English Videos into Different Languages' project at Atlas Copco

[Certificate](#)
- "Fishify: A Mobile-Based Fish Species Identification App with Transfer Learning Using MobileNetV1". Presented at SmartCom 2024 and subsequently Published by Springer.

[Link](#)
- "Edu-lingo: A Unified NLP Video System with Comprehensive Multilingual Subtitles", published as research by IEEE in IEEE Xplore.
